DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claim 1, drawn to the method of banding, classified in class 53, subclass
 399.

 Claim 2, drawn to the apparatus of banding, classified in class 53, subclass 588.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as an apparatus that causes the tip of the band to reach a predetermined position as set forth in the method claims and not the apparatus claims wherein the tip of the band does not reach a predetermined position.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
